We are looking for a graduate, preferably with a biochemistry background, to start work on this project in session 2 2014, or session 1 2015. The project involves identifying potential biomarkers for prostate cancer. Techniques to be used include proteomics and immuohistochemistry of prostate biopsies. This project is supervised by Professor Willcox from the School of Optometry and Vision Science at UNSW, and Professor Yong Li from St George Hospital, Kogarah. The successful candidate will be either an Australian citizen/permanent resident, or have been awarded a scholarship to pay University fees (e.g. TFS from UNSW, or from Country of origin government).

Please contact Professor Mark Willcox (m.willcox@unsw.edu.au) for further information.
