How Do Your Child's Eyes Feel?

UNSW Researchers are looking for school aged children to participate in a study about how comfortable their eyes are

What is the research study about?

- We are looking at how children respond to questionnaires about how their eyes feel, and whether this changes after viewing a smart phone.

Would the research study be a good fit for your child?

The study will suit interested children who are:

- 6-15 years of age
- Able to understand English

What would happen if my child took part in the research study?

This is a two-part study, your child may participate in Part A only, or Part A & B.

Part A

- Approximately 30 minutes
- Your child will be asked to fill in 2 sets of questionnaires about their eyes

Part B

- Approximately 90 minutes
- Your child's eye will be examined for changes in their eye before and after viewing a smart phone
- Your child will be asked to complete activities on a smart phone for 1 hour, and then answer a questionnaire about how their eyes feel

Will my child be paid to participate?

- All participants will go into the draw to win an Events Cinema family movie voucher valued at $49.
- Those who participate in the Part A only will be entered in the draw once, while those who participate in both Part A & B will be entered twice.

If you would like more information or are interested for your child to be a part of this study, please contact research team members:
