

Researchers at UNSW Sydney (The University of New South Wales) and the University of Auckland are seeking volunteer research participants to learn about the concentrations of telomerase, a marker of aging, in the human tear film.

Would the research study be a good fit for me?

The study might be a good fit for you if:

- Are not a contact lens wearer.
- Are aged over 18 years and younger than 30 years
- Have healthy eyes
- Are not taking oral or topical doxycycline or corticosteroids

What would happen if I took part in the research study?

If you decide to take part, we will ask you to attend for two 30-minute visits where we will observe your eye through our microscope and collect your tears.

Will I be paid to take part in the research study?

There are no additional costs associated with participation in this research study, nor will you be paid.

Who do I contact if I want more information or want to take part in the study?

If you would like more information or are interested in being part of the study, please contact:
